

## System Security Suites (listed alphabetically)

Computer Associates	<b>eTrust Internet Security</b>	\$ 69.95
Network Associates	<b>McAfee Internet Security</b>	\$ 79.99
Panda Software	<b>Platinum Internet Security</b>	\$ 79.99
Symantec	* <a href="#"><u>Norton Internet Security 2006</u></a>	\$ 69.99
Trend Micro	<b>PC-cillin Internet Security</b>	\$ 49.95
Zone Labs	<b>ZoneAlarm Security Suite</b>	\$ 69.95

This is critically important software for you to have on your system. Each suite is unique and has its own appeal. Usually you can download a free 30-day evaluation edition from the vendor's website. Please feel free to discuss these options with me and based on my assessment of your needs I will make a recommendation to you.

You can also go the "best of breed" route. Due to intense competition this is not as superior a way to go as it once was. Though it does afford you the ability to pick and choose, it will in the long run, cost you more money.

Talk to me! I will set up an interlocking, multi-layered security and maintenance solution for you and your system.

\*Highly recommended. Get information and download from my link.
